SKAGEN Credit SEK

Statusrapport september 2016

Kunsten å bruke sunn fornuft

SKAGEN Credit SEK – Nyckeltal

| Nyckeltal per 30 september | SKAGEN Credit SEK | Referens-index (OMRX-TBILL) |
|-----------------------------------|-------------------|--------------------------------|
| Avkastning sista månaden | - 0,2 % | - 0,1 % |
| Avkastning hittills i år | 6,0 % | - 0,6 % |
| Avkastning sedan start (30.05.14) | 0,0 % | - 0,2 % |
| Effektiv ränta* | 2,9 % | |
| Räntebindningstid (duration) | 1,0 år | |
| Genomsnittlig löptid | 2,8 år | |
| Spread – kreditriskpåslag(OAS)** | 392 bps | |

* För obligationer som handlas på en betydlig underkurs och där det är låg sannolikhet att få hela nominella belopp återbetalt kan effektiv ränta vara missvisande. Det beror på att effektiv ränta beräknas med full återbetalning av nominellt belopp vid förfall

** OAS genomsnittlig optionsjusterad kreditriskpåslag på innehavet, kontanter exkluderade

The SKAGEN Credit investment universe

SKAGEN Credit picks bonds both from the investment grade and the high yield spectrum with a high risk adjusted return potential. Minimum 50% investment grade.

Portfolio managers' comment

September was a sideways month in the credit market. After a quiet summer many of the companies issued new bonds in September. The increased supply of new bonds served to curb the price pressure we saw throughout the summer.

US government bond yields rose during the summer, and this had a negative impact on the fund. We have a low fixed duration in the fund of around one year, so the increase in yields will only have a minimal impact on the fund. The reason for the yields rising is market expectations that the Fed will increase their policy rate during the autumn.

In March the European Central Bank announced that they would start buying corporate bonds in order to reduce loan costs to European businesses. The central bank initiated the purchases in June and the effect has been noticeable. The credit spreads have come down significantly in the Eurozone and liquidity has deteriorated in the bond market. We have chosen to reduce our weighting in euro-denominated securities as we believe that the future return potential does not reflect the risk. Two years ago 30% of the fund was invested in euro-denominated bonds. That was reduced to 20% one year ago and further down to 12% at the end of the month as a result of developments. That is the main reason we currently have a high proportion of cash in the fund.

We have sold out of two companies this month, Diamond Bank and VW. Diamond Bank was our only African investment. It now appears unlikely that the Nigerian economy – which has been badly affected by the fall in oil price – will improve any time soon and we fear that banks in the country will suffer as a result. We sold out of VW as our investment thesis played out. We bought the bond when the diesel scandal was at its worst last winter on the hypothesis that the company was being overly punished in the financial market. That proved to be correct. The serious accusations have turned out to be true, but the company has taken responsibility and come to a settlement with many of the parties involved. The company is working on clearing its reputation among clients and in the financial market. We therefore see no further upside given the current pricing.

Average credit spread in SKAGEN Credit (May 2014 - Aug 2016)

- This graph shows the difference in yield between the bonds and the reference rates (interest rate swaps) of the same maturity.
- SKAGEN Credit has since inception had a portfolio with rather consistent credit quality, and the changes in the credit spread are therefore mostly related to market events.

The portfolio managers

The portfolio managers draw on their expertise in the fixed income markets, as well as SKAGEN's equity fund managers' long experience of successful stock picking. They have long-standing and complementary experience ranging from fixed income management to company analysis, risk management and trading.

- **Ola Sjöstrand** (pictured right) has worked for SKAGEN since 2006, managing a range of SKAGEN's fixed income funds. He launched and has been responsible for running the SKAGEN Krona fund, amongst others. Before joining SKAGEN, Ola worked as a portfolio manager at the Swedish Soya Group. A combination of strong analytical skills and investment experience applying SKAGEN's investment philosophy has primed Ola in finding good investment cases for the fund. Ola holds a BSc in Business Administration and Economics.
- **Tomas Nordbø Middelthon** (pictured left) has worked for SKAGEN since 2010, both as a risk manager and more recently as portfolio manager of SKAGEN's fixed income funds. Before that Tomas worked within financial services in Statoil, implementing financial risk management tools worldwide. Tomas holds an MBA in Finance and is an Authorised Financial Analyst. He has strong analytical skills and a background from financial risk management. His combined risk management and technical expertise is valuable in the screening and analysis of corporate bonds and portfolio construction.
