SKAGEN Credit SEK

Statusrapport december 2016

Kunsten å bruke sunn fornuft

SKAGEN Credit SEK – Nyckeltal

| Nyckeltal per 31 december | SKAGEN Credit SEK | Referens-index (OMRX-TBILL) |
|---------------------------------------|-------------------|--------------------------------|
| Avkastning sista månaden | 0,7 % | - 0,1 % |
| Avkastning i år | 7,1 % | - 0,7 % |
| Avkastning sedan start (annualiserad) | 0,4 % | - 0,3 % |
| Effektiv ränta* | 0,5 % | |
| Räntebindningstid (duration) | 1,1 år | |
| Genomsnittlig löptid | 2,6 år | |
| Spread – kreditriskpåslag(OAS)** | 262 bps | |

* För obligationer som handlas på en betydlig underkurs och där det är låg sannolikhet att få hela nominella belopp återbetalt kan effektiv ränta vara missvisande. Det beror på att effektiv ränta beräknas med full återbetalning av nominellt belopp vid förfall

** OAS genomsnittlig optionsjusterad kreditriskpåslag på innehavet, kontanter exkluderade

The SKAGEN Credit investment universe

SKAGEN Credit picks bonds both from the investment grade and the high yield spectrum with a high risk adjusted return potential. Minimum 50% investment grade.

Portfolio managers' comment

In December global credit spreads decreased, both in the High Yield segment, which consists of low rated bonds, and in the Investment Grade segment consisting of high rated bonds. Global corporate bond spreads are now below the five year average, as illustrated further on in this report. This level does not necessarily mean that one should not invest in corporate bonds, since the average level consists of several thousand of bonds, and there are very many bonds to be found at attractive prices relative the risk. With these generally lower corporate bond spreads it is even more important to pick the *right* corporate bonds, instead of just buying an index.

SKAGEN Credit had a good month, benefiting from the decrease in spreads. Several of the fund's holdings have now reached their price targets, and we have therefore sold out or reduced the size of several bonds. The proceeds from this have been placed in short bonds and certificates with low risk. These short-dated investments can, however, easily be replaced with bonds with a larger upside when the time is right.

New holdings in December: Volvo cars, Sparebank 1 Telemark, Sparebank 1 Nord-Norge, Agder Energi and Entra Eiendom

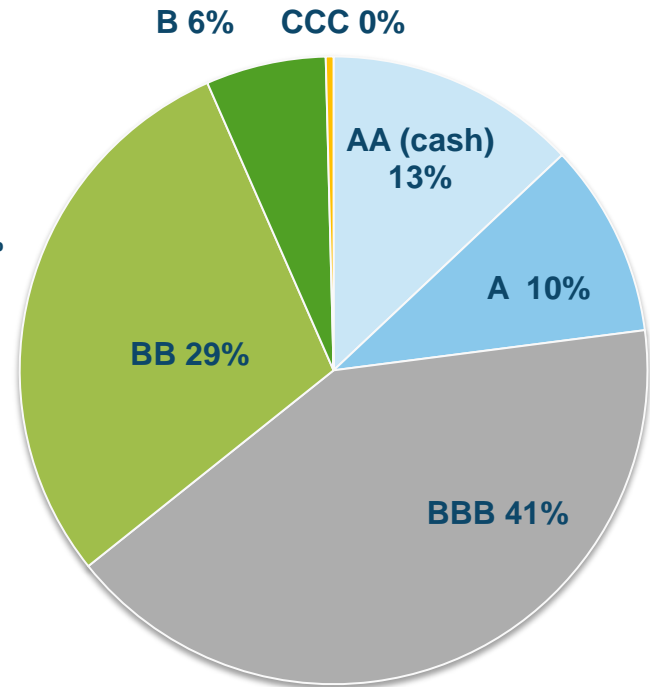

Holdings sold out in December: Stena, Norwegian Air, Ineos, Amlin and Insurance Australia Group

Global credit spreads (OAS), last five years

- The graph shows global corporate credit spreads, meaning the average global corporate funding cost in basis points above the risk free interest rate
- The lines show the average credit spread and +/- one standard deviation
- As of now credit spreads are close to the lower standard deviation

The portfolio managers

The portfolio managers draw on their expertise in the fixed income markets, as well as SKAGEN's equity fund managers' long experience of successful stock picking. They have long-standing and complementary experience ranging from fixed income management to company analysis, risk management and trading.

- **Ola Sjöstrand** (pictured right) has worked for SKAGEN since 2006, managing a range of SKAGEN's fixed income funds. He launched and has been responsible for running the SKAGEN Krona fund, amongst others. Before joining SKAGEN, Ola worked as a portfolio manager at the Swedish Soya Group. A combination of strong analytical skills and investment experience applying SKAGEN's investment philosophy has primed Ola in finding good investment cases for the fund. Ola holds a BSc in Business Administration and Economics.
- **Tomas Nordbø Middelthon** (pictured left) has worked for SKAGEN since 2010, both as a risk manager and more recently as portfolio manager of SKAGEN's fixed income funds. Before that Tomas worked within financial services in Statoil, implementing financial risk management tools worldwide. Tomas holds an MBA in Finance and is an Authorised Financial Analyst. He has strong analytical skills and a background from financial risk management. His combined risk management and technical expertise is valuable in the screening and analysis of corporate bonds and portfolio construction.
