Avkastning sista månaden	0,4 %	- 0,1 %
Avkastning hittills i år	1,2 %	- 0,2 %
Avkastning sedan start (annualiserad)	0,8 %	- 0,3 %

Räntebindningstid (duration)	0,9 år	
Genomsnittlig löptid	2,2 år

* För obligationer som handlas på en betydlig underkurs och där det är låg sannolikhet att få hela nominella belopp återbetalt kan effektiv ränta vara missvisande. Det beror på att effektiv ränta beräknas med full återbetalning av nominellt belopp vid förfall

The SKAGEN Credit investment universe

SKAGEN Credit picks bonds both from the investment grade and the high yield spectrum with a high risk adjusted return potential. Minimum 50% investment grade.

Portfolio commentary

- Global corporate bond spreads were largely unchanged in February, with only a small reduction in the High Yield segment.
- Today's levels are rather low, as illustrated in the graphs below. This, combined with the uncertain situation, in both the US and Europe, makes corporate bonds in general rather expensive. Bond picking is more important now than it has been for a long time.
- The level of risk in the fund has been reduced over the last few months as the risk-reward relationship is not as lucrative as it has previously been.
