

Performance Commentary

SKAGEN Focus delivered a return largely in line with global equity markets in January. Three of the fund's top-10 positions are located in the Japanese equity market, namely internet and tech conglomerate Softbank, financial conglomerate SBI Holdings and regional bank Bank of Kyoto. We continue to believe that the Japanese equity market represents one of the more attractive regions globally in terms of company specific valuation opportunities with tangible catalysts, in the form of improved capital allocation discipline. The markets are currently discovering the potential hidden value proposition in SBI Holdings, and the stock was a main positive contributor. Bank of Kyoto, or should we say Bank of Nintendo, also presented stronger than expected results and pushed the share prices higher. We also observed strong positive developments in our Italian bank Unicredit and oil service company Helmerich and Payne. Following a strong run at year-end, shares of the Swiss industrial baker Aryzta were lower as they disappointed on guidance for 2018. While gold prices have increased quite solidly since last year, South African Gold Fields was weaker due to currency volatility. During the month we exited US refiner Andeavor, UK beverage company Stocks Spirits and Japanese cement producer Taiheiyu Cement as the shares reached our price targets. We initiated three new positions, which we are gradually building towards target weight.

The fund is a concentrated global equity fund with a mandate to invest in all cap-sizes, geographies and sectors globally. With our concentrated portfolio of 30-35 core positions, we aim to generate absolute returns at a controlled level of absolute risk.
