

Performance Commentary

Continued political noise in the US combined with geopolitical uncertainty around North Korea created some volatility during the month. However, SKAGEN Global ended the month almost unchanged from the beginning of August. The largest positive contributor in August was the Danish pharma company Novo Nordisk, which delivered a strong Q2 result combined with positive news on both Semaglutide and Victoza. The largest detractor was the global security company G4S, following a somewhat disappointing Q2 result showing slowing top-line growth.

The fund added 3 new positions in August. The first of these is Deutsche Wohnen, the largest owner of residential housing units in Berlin, where we see structurally growing rents. The second newcomer is Waters Corporation, a specialty instrument mid-cap company with significant exposure to the pharma and food safety sectors, where we see long-term structural growth. Finally we added Chubb, a P&C insurance company with a global footprint, whose strong underwriting capabilities do not seem to be fully reflected in the current valuation. To fund the new positions, we sold out of Johnson Control, AIG, and Sanofi. The portfolio continues to look attractively valued with an average upside of 23% for the top 35 holdings.

The fund selects undervalued companies from around the world, including emerging markets, with attractive risk-reward for long-term investors.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.
