

Performance Commentary

Global equity markets continued to climb in May as investors gradually returned. The WTI oil price skyrocketed over 80% and recorded its best month on record as expectations around the supply-demand equation improved. SKAGEN Global outperformed the benchmark in May. The fund's top absolute performer was the family-controlled US trucking and logistics provider Old Dominion Freight Line, which is known for its operational excellence. The worst performer in absolute terms was the specialty insurer Beazley. Investors feared excessive losses in the wake of the virus-induced global lockdown. However, the insurance industry has faced several years of outsized losses and prices are now beginning to rise markedly. Beazley raised equity to take advantage of the attractive pricing environment and SKAGEN Global participated in this capital raise. The fund initiated two new positions that will be disclosed in due course. We exited Medtronic, Schindler and Hiscox to fund other holdings with more attractive long-term prospects. We also exited Equinor as the stock nicely recovered from the depressed levels when we entered the position and thus no longer looks significantly undervalued. The portfolio is attractively valued given the fund's long-term investment horizon.

The fund selects undervalued companies from around the world, including emerging markets, with attractive risk-reward for long-term investors.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.
