

Performance Commentary

October was another strong month for emerging markets and SKAGEN Kon-Tiki outperformed its benchmark. 2017 has been characterised by steady inflow into EM equity funds (USD 72bn YTD) and a continuous catch-up with developed markets. It was gratifying to see some of the fund's larger positions in Korea (Samsung Electronics, Hyundai Motor and LG Electronics) make significant positive contributions in October as a result of strong or improving earnings. The fund also benefited from the proposed recapitalisation of the Indian banking system through our holding in State Bank of India. Naspers continued to do well on the back of its holding in Tencent and our newly initiated position in Gree Electronics also contributed positively. The biggest detractors in October were Barrisul and X5 Retail though these have been positive contributors for the year as a whole. We initiated two new positions (Hollsys and Lenta) in October while we continued to consolidate the portfolio by exiting a handful of smaller positions. Our 35 largest positions account for 86% of the fund and are currently valued at 12.2x 2017 earnings and 1.1x book value versus 14.1x and 1.8x respectively for MSCI EM. Despite the recent performance, we see a 27% weighted upside to our portfolio.

The fund selects low-priced, high-quality companies, mainly in emerging economies.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Important information

Unless otherwise stated, performance data relates to class A units and is net of fees. Except otherwise stated, the source of all information is SKAGEN AS. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. You can download more information including subscription/redemption forms, full prospectus, Key Investor Information Documents (KIID), General Commercial Terms, Annual Reports and Monthly Reports from our local websites or our local representatives. Statements reflect the portfolio managers' viewpoint at a given time, and this viewpoint may be changed without notice. This report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN AS does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of this report. Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

The benchmark index is the MSCI EM Index (net total return), this index did not exist at the inception of the fund and consequently the benchmark index prior to 1/1/2004 was the MSCI World AC Index. This is not reflected in the table/graph above which shows the MSCI EM Index since the funds inception.
